Five ways of reading are lexical, literal, verbal, appropriate and affective. Each type is important to help readers truly understand the meaning of the text. Vocabulary awareness centers around an understanding of the key vocabulary words found in reading. Literal understanding focuses on answering what, who, who, when and where the story, but interpretation of understanding leads the reader to wonder What if or Why? With applied understanding, the reader uses basic information to form opinions. When readers understand the emotional and social aspects of the story, they use affective understanding. Without this kind of understanding, readers can easily get lost in words and fail to understand the plot.
